

The
Strength
of Concrete with the Beauty of
Natural Stone

The strength of concrete and the natural beauty of stone come together in Boral's exciting range of polished concrete. The product of extensive research and development, the Boralstone range provides highly innovative solutions in flooring.

Boralstone is more than just a superior polished floor... it's a well integrated flooring system that incorporates:

- a recommended group of specially trained Boralstone Placers
- a Polished Concrete Mix specifically engineered for Boralstone floors
- a recommended group of trained Boralstone Polishers & Sealers

In fact, our polishing system uses diamond encrusted grinding pads through to impregnated soap stones to achieve a true "Polished Stone" finish.

Boralstone is resistant to UV rays and fading.

Boralstone Finish Types

High Polish

A highly popular finish that exposes and highlights our select natural stones.

This system involves diamond grinding, stone buffing, surface sealing and final polishing. The end result is slick, smooth and expressive.

Burnished

A traditional style concrete floor with a modern design.

This system involves a "Boralstone 503" mix and a "Neutral Base" to ensure colours are consistent and the surface remains durable. The surface is sanded, sealed and polished to a high shine. The end result is stylishly subtle and sleek.

Coarse Cut

A refreshing textured surface well suited for external areas.

This system involves a coarse set diamond grind to a desired level of stone exposure followed by a deep layer of UV stable penetrating sealer. The end result displays a natural stone look with a smooth textured feel.

"High Polish", "Coarse Cut" and "Burnished" finishing levels can be applied to any of the above range of colours. Finish levels are to be specified prior to commencement of job.

The above colour range is a guide only. Custom colours & designs available on request. Please contact our friendly sales staff to discuss your options today.
